

Human-Environment Interaction

Read Ch. 18 sec 3 pgs. 424-427

After reading you will need to pick 1 of the 3 options.

Option 1: Draw a picture depicting EACH one of the 3 different human-environment interactions discussed in the section. Make sure to label the picture so people will better understand what is going on. Your grade will be based on neatness and organization.

Option 2: Create a chart with the following items to be included: location of interaction, cause of change to environment, impact on environment, possible solutions to problem. Make sure that you label each column and provide good information inside each box.

Option 3: Write a paragraph for each of the 3 different human-environment interactions. Discuss where the event is happening, what is the environment facing, and what can be done to help the environment and the humans at the same time.
