

USA and Canada Demographics

Use pgs. 108-115 in textbook to answer questions. Make sure to write down the states and the statistic. You will not get full credit without writing down the numbers to go with the states/provinces.

USA

1. What are the top 5 most populated states?
2. What are the 5 least populated states?
3. What would be the easiest place to see a doctor if you were sick?
4. You want to live in a city. What will be the first 3 states at which you will look?
5. Education is a priority to you. What would be the top 5 best states for you to move?
6. You like your space. What are the 3 biggest % of rural land with the lowest population density?
7. You want to live at a high standard. What would be the best place to move for a high paying job?
8. What 5 states need to improve their education system?
9. You are planning on building a hospital for children. What 5 states would benefit the most from your building the new hospital?

CANADA

10. Where would you see more bears than people in Canada? (Look at rural and population density)
11. What country has the lowest infant mortality rate? USA or Canada
12. What province would you move to if you were looking for a city life?
13. Why would it be dangerous if you were injured in the Northwest Territory?
14. How many provinces have less than 5 people per square mile?
